

Pet Playgröunds

Pet Playgrounds makes the safest and most reliable REAL dog fencing system in the world.™

- Invisible fences fail 30% of the time. Pet Playgrounds Dog Fences have a 2% failure rate.
- Our fence keeps predators out of your yard. Invisible fences allow every critter inside.

REAL DOG FENCES

About Us

Pet Playgrounds was founded in 2008 with the sole purpose of providing dog owners with an affordable and reliable way to contain their dog on virtually any property. Unlike invisible electric fences that only attempt to keep your dog in your

yard, our physical dog fence stops predators - like coyotes from entering your enclosure. Today, Pet Playgrounds continues to push the envelope with our unique materials, and assembly methods to create the perfect dog fence for your dog. We work with many rescue organizations and help them with their fundraising efforts. We have had our fence tested by certified dog trainers and veterinarians.

We pride ourselves by knowing that Pet Playgrounds makes the safest and most reliable REAL dog fencing system in the world.™

Pet Playgrounds manufacturers physical non-electric DIY dog fence kits and offers optional installation services nationwide.

Our fence acts as a flexible net that prevents dogs and other animals from climbing. The bottom material is flared in towards you and secured with unique ground stakes to create a dig guard.

You don't have to dig any holes, mix cement, or make any changes to your landscape. Our DIY Dog Fence Kit costs less than an installed invisible dog fence with training and has been tested and approved by certified dog trainers and veterinarians.

Dogs need to
run free!

Whether you have a rocky yard, a large dog, many dogs or even land our fencing system can be assembled to meet your exact needs.

Stop your Dog from Climbing Over or Digging Under with a Pet Playgrounds Dog Fence.

What we Offer

Pet Playgrounds is a real physical dog fence kit. It is NOT an electric fence. It comes with all of the components you will need to create a safe and secure play space for your dog. Unlike invisible electric fences that only attempt to keep your dog in your yard, our physical dog fence stops predators – like coyotes from entering your enclosure.

Do-it-Yourself Kits

Our DIY Kits come with everything you need to assemble your dog fence kit. Our extensive full installation video makes the process quite easy. View our installation video at petplaygrounds.com/install

Professional Installation

We offer professional installation nationwide. You can select the professional installation option at checkout and a local installer will contact you to schedule your installation. You can order your dog fence online at petplaygrounds.com/buy

Flexible Financing Available

We have partnered with Affirm to offer flexible payments options. You can apply during the checkout process and the approval process only takes seconds. To learn more about our financing options please visit petplaygrounds.com/affirm

What makes our dog fence special?

Our mesh-based dog fence is both flexible and strong. This prevents dogs from being able to climb over the fence and getting through the fence. Our fence has two main features:

Anti-Climb Feature

Unlike traditional rigid fences, our fence is a mesh-based fencing system that moves. That means dogs can't use our fence like a ladder to climb over the way regular fencing system allow dogs to escape. When a dog tries to climb over, it simply flexes so no dog can get a grip.

Anti-Dig Feature

Even if you have a physical fence, dogs can dig under your fence to escape. We have eliminated this possibility by creating a dig guard that prevents dogs from digging under your fence. It is a strong steel mesh layer that is secured into the ground using our ultra-hold ground stakes.

Every dog deserves to run free!

Traditional fences (like chain link fences) act like ladders and actually help dogs climb over. Our Dog Fence eliminates that possibility. The strength prevents your best friend from chewing through and the flexibility stops your dog from climbing over. Many types of breeds love digging, especially terriers, beagles and huskies. Unlike traditional fences, our fence does not end when it meets the ground, it keeps on going...for about a foot. Our fence comes with a dig guard, which is created by using a strong 19 gauge steel mesh layer that is secured to the ground with ultra-hold ground stakes.

Our commitment to rescue organizations

Pet Playgrounds has been working with rescue organizations since 2008 and we offer discounts and funding programs for rescue organizations and other animal charities. When a rescue organization works with us we provide them with a unique coupon code. When someone uses your coupon code on our website we send \$50 to the rescue organization and the person that is adopting their dog saves 5% of the sale price. It's a win-win!

Do you work for a rescue organization? Do you want to participate in our program? Simply fill out our form at petplaygrounds.com/rescue and we'll have you setup in less than 24 hours!

What our customers say

Don't just take our word for it!

Dr. Adam Boardman

Veterinarian

In the 6 months since the new fence was installed, there have been ZERO escapes, and believe me, our dog has tried. I am very thankful what Victor and Pet Playgrounds were able to do for us and would recommend them to any pet owner to keep their pet safely in their yard.

Etha Behrmann

Happy Customer

Our fence is finally finished! The dogs are very happy. We have challenging terrain and rocky ground. About 1000 feet of fencing in a very odd shape

Stephanie Williams

Dog Trainer

At half the cost of chain link, it was within our budget including installation. The fence is sturdy, and can be installed over any terrain.

Jolynn Huber

Happy Customer

My Huskies are having so much more fun in the snow after I installed the PetPlayground fencing. Worth the time & money...their safety & happiness is everything to me.
