WHAT MAKES OUR DOG FENCE SPECIAL?

Anti-Climb Feature

Unlike traditional rigid fences, our fence is a mesh-based fencing system that moves. That means dogs can't use our fence like a ladder to climb over the way regular fencing systems allow dogs to escape. When a dog tries to climb over, it simply flexes so no dog can get a grip.

Anti-Dig Feature

Even if you have a physical fence, dogs can dig under your fence to escape. We have eliminated this possibility by creating a dig guard that prevents dogs from digging under your fence. It is a strong steel mesh layer that is secured into the ground using our ultra-hold ground stakes.
